

GPM CEO Awarded to Doug Olsen

April 20, 2010 – Doug Olsen has been appointed to CEO by a unanimous vote by GPM's Corporate Board during their 2009 Annual Meeting held in December, 2009. GPM is very excited to have Doug in the role of CEO which will help position GPM with strategic decisions now and in the future.

Doug joined GPM in June, 2007 and has made significant contributions in operations, accounting, and service. Doug is respected for his engineering capabilities as he is a degreed Mechanical Engineer. Currently, Doug is heading our CRM initiative which will coordinate all facets of the company. This has been a 2-year process which should be implemented this year.

By expanding Doug's corporate responsibilities, which include oversight for much of the day to day operations, it has allowed Pete Gemuenden, GPM President to move full-time into a role that he has been developing for several years, which is CVO (Chief Visionary Officer). Pete's focus has always been on not to look at where we have been or are today, but to how we are going to move into the future. GPM values the ability for Pete to spend time searching for opportunities and looking at our corporate direction during this challenging economic time.

GPM is looking forward to continued growth and prosperity and feel that we have a great opportunity with Doug Olsen leading us with his many talents as CEO.
